
Software Requirements Specification (SRS) Document

E-commerce Application - Magento

1. Introduction

1.1 Purpose

The purpose of this document is to provide a detailed description of the requirements for an e-commerce application based on the Magento platform.

1.2 Scope

This application aims to provide a robust and user-friendly e-commerce platform using the Magento framework. It will allow users to browse and purchase products, manage their accounts, and provide an administrative interface for managing products, orders, and customer data.

1.3 Definitions, Acronyms, and Abbreviations

- SRS: Software Requirements Specification

2. Overall Description

2.1 Product Perspective

The e-commerce application will be built on top of the Magento platform which provides a scalable and customizable foundation for online stores. It will integrate with various payment gateways and shipping providers to facilitate secure transactions and efficient order fulfillment.

2.2 Product Features
