

1. Introduction

The purpose of this document is to outline the requirements for the development of a web application. It aims to provide a clear understanding of the goals, objectives, and intended users of the application.

2. Goals and Objectives

2.1 Goals:

- Develop a user-friendly and intuitive web application.
- Provide a platform for users to perform specific tasks efficiently.
- Enhance productivity and streamline processes for both individuals and organizations.
- Ensure data security and privacy.

2.2 Objectives:

- Create an attractive and responsive user interface that is compatible with various devices and browsers.
- Implement robust functionality to support the desired features and tasks.
- Integrate secure authentication mechanisms to protect user accounts.
- Enable efficient data management, storage, retrieval, and analysis.
- Incorporate collaboration features for effective communication among users.
- Offer customization options to tailor the application according to individual preferences.

3. Intended Users

The web
