Content: Sure, here is an example of a Software Requirements Specification (SRS) document template:

1. Introduction
1.1 Purpose
1.2 Scope
1.3 Definitions, Acronyms, and Abbreviations
1.4 References
1.5 Overview

2. Functional Requirements
2.1 User Registration and Authentication
2.1.1 Description
2.1.2 Inputs
2.1.3 Processing
2.1.4 Outputs
2.1.5 Error Handling

3. User Roles and Permissions
3.1 Description
3.2 User Roles
3.3 Permissions

4. Security Requirements
4.1 Data Encryption
4.2 Secure Connections (HTTPS/SSL)
4.3 User Authorization

5. Data Storage
5.1 Database Requirements
5.2 Third-Party Services

6. Integration Requirements
6.1 External Systems or APIs
6.2 Third-Party Services or Platforms

7. Performance Requirements
7.1 Response Times
7.2 Concurrent User Capacity

8. Deployment Environment and Hosting Platform

9. Non-Functional Requirements
9.1 Usability
9.2 Reliability
9.3 Scalability
9.4 Maintainability
9.5 Portability

10. Constraints

11. Assumptions and Dependencies

12. Appendices
12.1 Glossary
12.2 Use Case Diagrams
12.3 Wireframes/Prototype

Please note that this is just a template, and you should tailor it to your specific project requirements.
